

Project Notice: Reconstruct and Extend Runway 16-34 and Construct New Taxiway E Project

L.P. Henderson Road, Beverly, MA
Summer 2026

Project Overview:

The Beverly Regional Airport (Airport) proposes to reconstruct Runway 16-34 within its current footprint and extend it by 300 feet at each end by paving the Runway Safety Area and to construct a new Taxiway E parallel to Runway 16-34. This effort will also require the acquisition of a 0.2-acre, landlocked parcel along the north side of the runway.

The Project is a safety enhancement project and will not change the Airport traffic volume or capacity. The longer runway and parallel taxiway are necessary for aircraft currently using the Airport. No work is proposed outside of the existing airport property beyond the property acquisition. The Project will not change other surfaces or vegetation management to adjacent properties.

The Airport is designing and permitting this Project through a consultant team and seeks to engage and inform those who live and work in the area. The Airport will host a public meeting in July 2026 to provide information. Please visit the website below to find information about the upcoming meeting.

Scan the QR code to go to the Project website.

Project limits within the Airport Property and the parcel to be acquired.
